FLORIDA
COLLEGE

Professor of Physics

Florida College is seeking a full-time, tenure track faculty member to add to its Department of Mathematics and Science to teach courses in the physical sciences, with a start date of August 1, 2027. This role presents an exciting opportunity to be part of the mission of Florida College: to educate the whole person to imitate Christ in service to God and others. Like all Florida College employees, the individual who serves in this role will be privileged to serve our amazing students while working collaboratively with dedicated fellow Christians.

The ideal candidate will be an innovative faculty member with a terminal degree in physics (or a related field) who has experience in both industry and academia; however, individuals with a master's degree in physics (or a related field) will be considered. The successful candidate is expected to pursue exceptional teaching, which includes mentoring and advising students while continuing professional development and growth in their respective field. Florida College is first and foremost a teaching college; however, we value scholarship, especially research that involves undergraduates, as part of excellent teaching.

Qualifications and Experience

- Committed to the unique Christian mission and values of Florida College, including a willingness to adhere to the Florida College code of conduct in personal and professional life
- Possesses professional and proactive work ethic, including self-motivation and creativity in problem-solving
- Credentialed to teach physical science courses in an undergraduate setting, typically met by holding a master's degree with 18 graduate hours in courses in the discipline.
- Teaching experience within the physical sciences, at the college level, preferred
- Willingness and ability to support future growth of the math and science programs
- Ability to work collegially with a diverse group of faculty, staff, administrators, and students

Responsibilities

- Teach a full course load each Fall and Spring semester, typically defined as four courses per semester.
- Establish rapport with students in the classroom and engage with students beyond the classroom by supporting and attending student activities.
- Maintain regularly scheduled office hours to be available for students in accordance with FC personnel policy.

- Serve on institutional or academic committees and sponsor student organizations, as assigned by the Provost.
- Participate regularly in professional development, committed to personal growth and excellence as a science instructor, scholar, and member of the Florida College faculty.
- Engage in service and scholarly activity with an interest in continued growth and enhancement of the department's critical role among Florida College's academic programs.
- Work collaboratively with the Florida College faculty, staff, and administration to contribute to the Florida College mission.

Inquiries about the position should be directed to Dr. Tom Hamilton, the Provost and Vice-President of Academics, at hamiltont@floridacollege.edu.

Application letters, CV, and transcripts of all graduate coursework (unofficial copies are acceptable) should be submitted to Wes Mallory, the Director of Human Resources, at MalloryW@floridacollege.edu, indicating in the subject line both the name of applicant and the academic area of the faculty position.

Applications received by November 30, 2026 will receive full consideration; beyond that date the job posting will only be open until filled.

Florida College is committed to maintaining a safe and secure campus environment and protecting the college's financial and physical assets. Therefore, Florida College conducts background checks on all finalists for employment in faculty positions.

Florida College is an Equal Opportunity Employer and does not engage in prohibited discrimination in employment based on race, color, religion, national or ethnic origin, age, sex, disability, or prior military service. Florida College complies with applicable federal and state nondiscrimination laws. All applicants must respect and comply with the established goals and practices of Florida College as a Christian oriented educational institution. Successful candidates must demonstrate support for the mission and values of Florida College Academy.

Florida College is a private, independent liberal arts college, providing a comprehensive college experience designed to develop students spiritually, mentally, physically, and socially by integrating into the students' lives the Bible as the revealed will of God in order to prepare students for lives of service to their Creator and to others.
